AZIZUL HAKIM

Full-Stack Web Developer

+201558835659 | hakimsanny898@gmail.com | github.com/hakim-azizul | linkedin.com/in/azizul-hakim898

CAREER OBJECTIVE

Full-Stack Web Developer experienced in building responsive web applications with React, Next.js, TypeScript, and Tailwind CSS, including authentication and database integration. Currently strengthening backend skills with Node.js, Express.js, and MongoDB. Seeking a junior developer role where I can contribute to real products and grow into a well-rounded full-stack engineer.

SKILLS

Languages: HTML5, CSS3, JavaScript, TypeScript
Frontend: React, Next.js, Tailwind CSS
UI Libraries: DaisyUI, HeroUI, ShadcnUI
Authentication: Better Auth, Google OAuth, Email/Password, Social Login (Google, GitHub), JWT, JWKS (jose)
Database: MongoDB Atlas
Libraries: Lucide React, React Hot Toast, React Toastify
Backend: Node.js, Express.js, REST APIs, JWT Authorization Middleware, CORS
Tools & Platforms: Git, GitHub, Vercel (Edge and Serverless deployment), Vite
Interpersonal: Problem Solving, Self-Learning, Multilingual Communication, Time Management

PROJECTS

BookNook — Library Management System

Full-stack digital library app for browsing, borrowing, and managing books with secure access control. Built with Next.js (App Router), HeroUI, Tailwind CSS, Node.js, Express.js, MongoDB Atlas.

- Secure Google OAuth sign-in using better-auth with JWT and JWKS verification.
- Searchable, filterable catalog across categories such as Literature, Philosophy, History, and Non-Fiction.
- Borrow and return workflow with a list of each user's active borrowed books.
- Protected admin CRUD for book inventory, secured by server-side JWT middleware.
