AZIZUL HAKIM

Junior Full-Stack Web Developer

hakimsanny898@gmail.com | GitHub: github.com/hakim-azizul | LinkedIn: linkedin.com/in/azizul-hakim-4a2a30240

PROFESSIONAL SUMMARY

Aspiring Full-Stack Web Developer with hands-on experience building responsive web applications using React, Next.js, TypeScript, and Tailwind CSS. Familiar with authentication integration, database connectivity, and modern frontend development practices. Currently expanding backend development skills with Node.js, Express.js, and MongoDB. Passionate about building practical, user-friendly applications and continuously improving technical skills.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript, TypeScript
Frontend: React, Next.js, Tailwind CSS
UI Libraries: DaisyUI, HeroUI, ShadcnUI
Authentication: Better Auth, Email/Password Authentication, Google, GitHub and other Social Login
Database: MongoDB Atlas
Backend: Node.js, Express.js (currently learning)
Tools & Platforms: Git, GitHub, Vercel, Vite

PROJECTS

1. BazarDor — Daily Market Price Tracker

A web application designed to help users explore and compare the prices of everyday essentials across different markets in Bangladesh.

- Explore daily prices of essential products across markets.
- Compare prices and track daily price changes.
- Browse products using relevant categories and units.
- Manage user profiles and access authentication features.

Technologies: Next.js, React, Tailwind CSS, HeroUI, React Toastify, Better-Auth, MongoDB
GitHub: https://github.com/hakim-azizul/bazar-dor

2. FitLog — Workout Planner

A workout planning application that helps users organize workout routines and manage their fitness activities.

- Create and manage workout plans.
- View today's workout plan and saved routines.
- Sort workouts by duration, calories, or name.
- Prevent duplicate entries and display toast notifications.

Technologies: Next.js 14, React 18, TypeScript, Tailwind CSS, DaisyUI
GitHub: https://github.com/hakim-azizul/Fit-Log

3. DevStack — Personalized Tech Stack Explorer

A web application for exploring technology categories and building a personalized technology stack.

- Explore different technology categories.
- Select technologies to create a personalized stack.
- Use a responsive interface to navigate technology options.

Technologies: React, TypeScript, Vite, Tailwind CSS, DaisyUI
GitHub: https://github.com/hakim-azizul/DevStack

4. Book-Vibe — Book Discovery Application

A web project focused on a book-related user experience.
Live Demo: https://book-vibe-five-dusky.vercel.app/ | **GitHub:** https://github.com/hakim-azizul/Book-Vibe

5. Additional Projects

- **DEVCONF-2026** — https://github.com/hakim-azizul/DEVCONF-2026
- **Dorm Meal Management** — https://github.com/hakim-azizul/Dorm-Meal-management

EDUCATION

Al-Azhar University — Cairo, Egypt
Faculty of Sharia and Law, Arabic Section | Undergraduate Student

CURRENT LEARNING

- Backend development with Node.js and Express.js
- REST API development
- MongoDB database operations
- Full-stack application architecture

PROFESSIONAL INTERESTS

Full-Stack Web Development, Modern Web Technologies, Backend Engineering, API Development, and Building Practical Web Applications.
